ACKNOWLEDGEMENT

First and foremost, I thank God Almighty for his eternal love and protection throughout the Project. I take this opportunity to express my gratitude to all who helped me in completing this project successfully. It has been said that gratitude is the memory of the heart. I wish to express my sincere gratitude to our manager **Rev. Fr. Dr. Mathew Paikatt** and Principal **Dr. Z V Lakaparampil** for providing good faculty for guidance.

I owe a great depth of gratitude towards our HOD **Fr. Rubin Thottupuram** for helping me. I extend my whole hearted thanks to the project coordinator and class teacher **Sr. Elsin Chakkalackal** for her valuable suggestions and for overwhelming concern and guidance from the beginning to the end of the project. I would also like to express sincere gratitude to **Mrs. Merin Manoj** for her inspiration and helping hand as my internal guide.

I thank our beloved teachers for their cooperation and suggestions that helped me throughout the project. I express my thanks to all my friends and classmates for their interest, dedication, and encouragement shown towards the project. I convey my hearty thanks to my family for the moral support, suggestions, and encouragement to make this venture a success.

ALBIN SALU

ABSTRACT

The idea of URL shortening is to reduce the burden of handling long complicated URLs. With URL shortner a user can shrink the length of the input URL into a short one that can be handled easily and can be used instead of the original one. When a user enters the shortened URL into the address field he's redirected to the original URL. This can be compared with a QR code. The input URL is given a unique Token. When this token is invoked the control is redirected to the original URL present in the database. URL shortening services are coming to the upfront as the use of social medias are growing as we speak.
